Why use Genesis? Genesis contains a peptide chain called Acetyl Glutathione, a small protein composed of three amino acids: cysteine, glutamic acid, and glycine. This naturally occurring substance acts as an antioxidant, an immune system booster and a detoxifier. It can help the body repair damage caused by stress, pollution, radiation, and infection. As we age, our cells begin to die. By using products that contain Acetyl glutathione you can help repair the damaged cells by rebuilding the mitochondria.
